SOLAR DISPLAY SYSTEMS

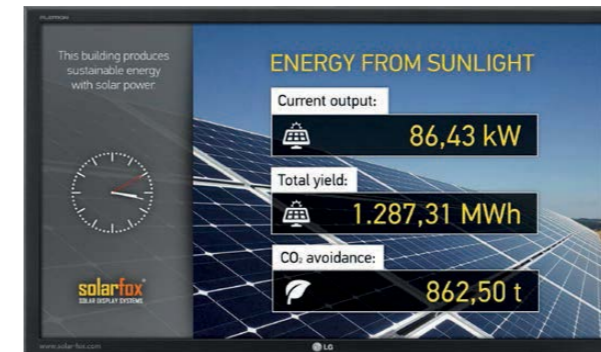

Solar Display
& innovative bulletin board

Solarfox® displays present energy data from renewable energy sources and solar power systems in an innovative way. The displays present key figures with changing content in an infinite loop. The user can individually configure how the information is presented on screen – whether in sequence, timescales or images. All of the content can be tailored to meet the needs of individual users. Content and reporting as well as images and videos can also be supplemented. What's more, you can select from a large number of templates. The displays are simple to operate and can be managed online via a web browser.

Large solar displays

for indoor use

Indoor

Solarfox ® SF-100 Serie
24" (61 cm) to 32" (81 cm)

The SF-100-Series is suitable for indoor use. This series of models is the perfect offer for beginners, who like cost-optimized functionality. The displays can be operated up to 10 hours daily or switched on and off via a timer.

Indoor professional

Solarfox ® SF-300 Serie
24" (61 cm) to 75" (190 cm)

The SF-300 Series was developed for professional indoor use. The display's panel technology was designed for extended operating times resp. permanent operation and offers reflectionfree presentations and visual angles of up to 178°. The tools can also be configured individually for each day via an automated timer function.

Large solar displays

for outdoor use

Outdoor professional

Solarfox ® SF-400 Serie

32" (81 cm) to 55" (140 cm)

The SF-400-Series is equipped with tough metal housings, ventilation, and heating. This way it is protected against humidity, moisture, heat, as well as vandalism and theft. The systems meet IP-54 protection regulations and can be used at temperatures from -30° to 45°C. The energy consumption is reduced via a time which can be adjusted individually for each day.

You decide the content

A perfect match in design and function

Each Solarfox® display features a specific number of templates and predefined graphs as standard. Users can adopt them without any changes or adapt them to their own needs.

Solarfox® is constantly developing the templates and presentations. This way, you can expand your Solarfox® slideshow at any time and make it more attractive with new content.

Solarfox® pricelist

The SF-100 and SF-300 series are designed for indoor operations. SF-400 series can be used in outdoor areas. All units are designed for permanent operation and consist of a programmable timer switch (except SF-100 / SF-300 24").

All models come up as a complete system with all necessary components (Plug&Play):

- Solarfox® Widescreen (24"- 75")
- Integrated Solarfox® minicomputer and software (preconfigured)
- Wall mount bracketry (wall clearance ca. 6-8 cm)
- Accessories (cable, power adapter, etc.) - WiFi integrated in SF-300/SF-400

Range of models SF-100 (Indoor)	Article nr.	Price
